

**Its integrated technology enables a steady weld. Ideal for professional for a regular and intensive work. It's also a light machine (5 kg) easy to carry.**

### ELECTRODES FROM 1.6 TO 5

- Welds Rutils, Cast-iron and Stainless-steel electrodes

### «SCRATCH» TIG

- For work on thin metal sheets

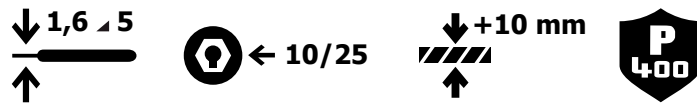

### ARC QUALITY

- Instantaneous start
- High penetration and arc stability

### POWER CONTROLLED

- Low consumption 32A-230V
- Tolerant to current fluctuation or arc length
- Protected and compatible with generator 7Kw (10Kva)

### INVERTER TECHNOLOGY

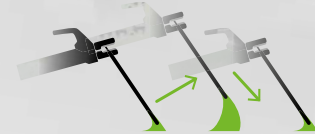

**HOT START**  
Additional power to start the arc

**ANTISTICKING**  
Decrease of current to release the electrode

**ARC FORCE**  
Instantaneous increase of current

### FEATURES

**Supplied in a box set which includes:**

- Earth clamp
- Electrode holder
- Strap
